

**Halfedge Mesh Voxelizer, Constantin Geier**

Final Presentation, Geometry Processing

# Surface Voxelization - repetition

Surface voxelization

Solid voxelization

Octree-based solid voxelization

## Visualization of h.e.d.s

# Visualization of h.e.d.s

# Challenges 1 - Indexed Vertices

# Challenges 1 - Indexed Vertices

Adjacent cubes - edges with  $\neq 2$  faces unless inner faces removed

## Removing inner faces

## Challenge 2 - special case

Fixed by adding  
another edge

# Final surface Voxelized Mesh is

- Watertight & manifold if input mesh is non-manifold (e.g. Bunny)
- Watertight if input mesh is a manifold (e.g. Sphere), no link between inner and outer surface

input mesh
